WORKING AT HEIGHT:

1. assess all risks;
2. plan, organize, and supervise the work thoroughly and ensure it is carried out in a safe manner;
3. ensure those involved in the work (including the planning, organizing, supervising, and carrying out) are competent;
4. make sure the working area is safe and so far, as possible includes features to prevent a fall (such as a railing);
5. provide suitable measures (such as using an existing place or work or means of access) or if not possible, then suitable equipment to prevent falls – and ensure they are used, with preference to collective systems (such as a physical barrier) where possible and personal systems (such as a harness) where not;
6. where a risk of falling remains, use work equipment or other measures to minimize the distance and consequence of any fall if possible, and if not, so far as possible, provide additional training and/or instruction to prevent the risk of falling;
7. inspect and maintain work and safety equipment on each use or as appropriate
8. except for members of an emergency service acting in an emergency, only allow working at height when weather conditions make it safe to do so
9. prevent where possible or otherwise minimize risks posed by fragile surfaces or falling objects (including not working on or near or passing across fragile surfaces if possible, or otherwise displaying prominent signs
10. create a plan for dealing with emergencies and for rescue

HARNESS AWARENESS:

11. Course Content
12. 1 Health and Safety Module
13. 2 Health and Safety Executive
14. 3 Correct use in the workplace
